

Custom Fabricated Weldment

Structural weldment fabricated and machined to your assembly drawing.

Overview

A structural weldment fabricated from sheet and plate stock and machined to final assembly tolerance, produced to your drawing with full weld inspection documentation.

Suited to structural frames, brackets and assemblies too large or low-volume to justify dedicated tooling.

Technical Specifications

Material	Structural steel, grade per drawing
Process	Weld fabrication + final machining
Inspection	Weld inspection documentation included
Volume Range	Low-volume to mid-volume

Typical Applications

- Structural frames
- Low-volume equipment brackets
