

Custom Machined Enclosure

Fully custom enclosure machined to your drawing and finish spec.

Overview

A fully custom enclosure machined to your drawing, from a single prototype through production volumes, with finish and hardware options matched to your application.

Our applications team reviews every custom drawing for manufacturability before quoting, so you know upfront if a design change would meaningfully reduce cost or lead time.

Technical Specifications

Material	As specified by customer drawing
Tolerance	Per drawing, DFM-reviewed at quoting
Finish Options	Anodizing, powder coat, plating
Volume Range	Prototype to full production

Typical Applications

- Custom electronics enclosures
- Bespoke equipment housings
