

Landing Gear Pivot Pin

High-strength pivot pin for landing gear articulation points.

Overview

A high-strength pivot pin used at landing gear articulation points, machined from certified aerospace steel bar and ground to a tight diameter tolerance.

Every pin is individually serialised and traceable to its source material heat and certification.

Technical Specifications

Material	300M Aerospace Alloy Steel
Diameter Tolerance	±0.01mm
Hardness	50–54 HRC
Traceability	Individually serialised

Typical Applications

- Landing gear articulation
- High-load pivot points
